Art Unit: 3662

1. The drawings are objected to because the boxes in fig. 1-4 need to be labeled. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claims 20-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 is improper because it does not further limit claim 1.

Claim 21 is improper because it does not further limit claim 1.

Claim 22 is improper because it does not further limit claim 21.

Art Unit: 3662

Claim 20 is not restricting the technical features of the array signal processing system since such a system is indistinguishable from a system using the same calibration parameters, but derived by a different method.

3. Claims 1-19 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
